Kakinada, Andhra Pradesh, India | +91 7036331440 | rajkumar0yarra@gmail.com
Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience in web application security testing, vulnerability assessment, and security research. Completed **50+ PortSwigger Web Security Academy labs** covering SQL Injection, XSS, Authentication, Access Control, SSRF, XXE, JWT, File Upload and other OWASP Top 10 topics, and identified and responsibly disclosed **14+ web application vulnerabilities**. Experienced with Burp Suite, Nmap, Wireshark, Python, Linux and YARA through internships, independent research, and security tool development.

TECHNICAL SKILLS

Web Security: OWASP Top 10, VAPT, Web Application Security Testing, Security Research

Security Tools: Burp Suite, Nmap, Wireshark, OWASP ZAP, Hashcat, YARA

Programming: Python, C, HTML, CSS, Flask, React

Operating Systems: Kali Linux, Linux, Windows

Virtualization: VMware, VirtualBox

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Junior Security Analyst Intern – Luminrex

2026

- Assisted in web application security assessments.
- Performed reconnaissance, vulnerability validation and documentation.
- Prepared professional security reports with remediation guidance.

Cyber Crime Department Intern – Visakhapatnam

- Observed cybercrime investigation workflows.
- Assisted with digital evidence handling and forensic procedures.
- Learned cyber incident reporting processes.

SECURITY RESEARCH & TESTING

- Completed 50+ PortSwigger Web Security Academy labs with practical experience in SQL Injection, XSS, Authentication, Access Control, CSRF, SSRF, XXE, JWT, File Upload, Business Logic and Web Cache Poisoning.
- Solved 22+ CTF challenges at CyLab Security Academy.
- Identified and responsibly disclosed 14+ web application vulnerabilities through manual testing with Burp Suite and browser developer tools.
- Authored structured vulnerability reports with proof of concept, impact analysis and remediation guidance.

PROJECTS

CYBERX – Malware Scanner using YARA

- Developed a malware scanner using Python, Flask and custom YARA rules.
- Automated malware classification and report generation.

CYBER-REQ – HTTP Request Testing Tool

- Developed a GUI-based HTTP testing application with configurable requests and logging.

CYBER-KEY-PULSE

- Built an educational project demonstrating keystroke monitoring concepts in controlled environments.

EDUCATION

B.Tech in Cyber Security, KIET (JNTUK)

2022 – 2026

CGPA: **7.34/10**

CERTIFICATIONS

- Cyber Security Professional – NASSCOM IT-ITeS Sector Skills Council (SSC) (Jul 2026)
- Foundations of Cybersecurity – Google
- Skill India Cyber Security – Mahindra Foundation
- Palo Alto Networks Cybersecurity
- Ethical Hacking Virtual Internship
- Zscaler Networking Virtual Internship
- Saviynt Identity Security for the AI Age

ACHIEVEMENTS

- NCC ‘C’ Certificate Holder.
- Gold Medal – NSC Seamanship Event.
- Conducted cybersecurity awareness session for NCC cadets.
- Participated in BSides Vizag and OSAMSEC.
- Built and deployed a personal cybersecurity portfolio website.
